New Tech Institute HS is glad to be part of the 2020 Public Education Foundation Technology Showcase!

**Our exhibits:**

- Space-Time Simulator built by our Advanced Physics students and introduced at the 2020 New Tech STEM Fest in February.
- Wind Tube built by our 2018-19 Advanced Physics students, which will be used by the Evansville Museum.
- Poster and example of sub-irrigated planters created by students in our Art classes... combining recycling and science.

New Tech is a small EVSC high school where students learn by doing in a family-like atmosphere of trust, respect, and responsibility. Project-Based Learning and STEM are our main modes of instruction. We have an Archery Team, FIRST Robotics Team along with many other extra-curricular activities.

Our students complete a Science Fair project each year, and in 2019 Junior Mackenzie Hunt placed 4th in the world in Engineering at the Intel International Science and Engineering Fair.
